

Murari Shrivastava

Senior Backend Engineer – Python | Django | FastAPI | AI Integration

shrivastava.murari@gmail.com | +91-90399 48775 | github.com/Murari2209 | New Delhi, India

PROFESSIONAL SUMMARY

Senior Backend Engineer with **9+ years** building scalable, secure, high-availability systems. Deep expertise in **Python, Django, FastAPI** and relational databases (**PostgreSQL, MySQL, Oracle/PL-SQL, MS SQL Server**). Proven in **defence and government financial platforms** handling sensitive pension/audit data. Hands-on with **AI/LLM integration, REST API design, CI/CD, and AWS**. Targeting Senior/Lead Backend Engineer roles across India.

CORE COMPETENCIES

Languages	Python, SQL, PHP, JavaScript	AI & Data	OpenAI API, LLM Integration, Pandas, NumPy, Matplotlib
Backend	Django, FastAPI, REST APIs, Django REST Framework	Cloud & DevOps	AWS (EC2, S3), GitHub Actions, CI/CD, Docker, Vercel
Databases	PostgreSQL, MySQL, Oracle DB, PL/SQL, MS SQL Server	Architecture	System Design, Secure APIs, Caching, Microservices, Agile

PROFESSIONAL EXPERIENCE

Senior Software Engineer – Aid4sure Corporate Services Pvt Ltd

Apr 2025 – Present | Remote

- Led Python/Django backend development for SaaS clients across e-commerce, healthcare, and education; built a scalable e-commerce platform with Stripe integration.
- Integrated OpenAI/ChatGPT APIs to automate backend workflows; implemented CI/CD via GitHub Actions and AWS.
- Delivered Django-based CMS that significantly reduced client administrative overhead; managed end-to-end client delivery.

Senior Software Engineer & DBA – AARDEE Solution Pvt Ltd

Apr 2022 – Mar 2025 | New Delhi | Client: Joint Controller of Defence Accounts

- Architected secure, uptime-critical applications for government defence financial systems handling sensitive pension and audit data for thousands of retired personnel.
- Designed optimised schemas and PL/SQL queries on Oracle & MS SQL Server, cutting critical report generation time by 40%+.
- Led zero-downtime database migrations and system upgrades with zero data loss; maintained 99.9%+ availability for live government operations.
- Established security compliance frameworks, coding standards, and DBA practices (backup, tuning, access control) for sensitive government infrastructure.

Software Engineer & DBA – Akal Infosystem Pvt Ltd

Nov 2019 – Mar 2022 | New Delhi | Client: Indian Air Force

- Managed and optimised MS SQL Server databases for classified Indian Air Force datasets; improved query performance by 60% via indexing and schema optimisation.
- Developed secure backend components for high-reliability Air Force applications; ensured compliance with defence IT security protocols.

Software Engineer – Backend (PHP) – Spread Digital

Feb 2017 – Aug 2019 | New Delhi

- Built scalable PHP/MySQL backend systems for high-traffic platforms; optimised queries and caching to handle growing load reliably.

Web Developer – Codelogic Consultancy Services

Jun 2015 – Jan 2017 | Gwalior

- Developed PHP/MySQL web applications focused on backend stability, performance, and business workflow automation.

KEY PROJECTS

Pension Sanction System (Indian Air Force)

Stack: PHP, MySQL, MS SQL Server, PL/SQL

Secure audit-grade system for processing IAF personnel pensions and generating e-PPOs; built RBAC, tamper-proof audit trails, and automated reports for live government operations.

GitHub Developer Analyzer

Stack: Python, FastAPI, GitHub REST API, MySQL, Pandas

Analytics platform evaluating developer activity and repo insights; rate-limit-aware caching, structured DB storage, and Pandas-based reporting.

ListedVegan – Location-Based Discovery API

Stack: Python, Django, REST API, MySQL

Geolocation-enabled REST backend to discover nearby vegan venues; clean API contracts, pagination, and search indexing.

AI Engineer Portfolio

Stack: Next.js, TypeScript, Tailwind CSS, OpenAI API, Vercel

Modern portfolio showcasing AI integration projects; reusable component architecture and CI/CD via Vercel.
